

Press release to be published 28.5.2018

Medicine part of Systematic's delivery to Region South in Denmark

Region South Denmark and Systematic have signed an agreement whereby 22.000 healthcare professionals in the region will start using the Columna patient management system. Region South has a population of 1.2 million and has 23 places of treatment across 13 hospitals.

As part of the solution Systematic provides Columna Citizen, a connected care solution based on the Medicine Suite product. The Columna Citizen delivery will include a patient portal with secure messaging, questionnaires and health coaching among others.

Medicine is one of the leaders in connected care in Europe with over 15 years of experience in over 10 countries. Its Medicine Suite software provides a comprehensive suite of all functionalities needed in connected care coupled with a scalable and flexible platform.

“We are excited to work with our long-time partner Systematic in this project. This large scale regional implementation demonstrates the scalability and flexibility of our Medicine Suite solution. The two companies can each concentrate in their core area of expertise; Systematic in the patient management system and Medicine in connected care. The combined system then includes the best of both worlds”, says Dr. Tapio Jokinen, CEO of Medicine.

Systematic's press release about the project and information about the company can be found at <https://systematic.com/about/news/>

About the Region of Southern Denmark

23 places of treatment across 13 hospitals divided between four hospitals units: Odense University Hospital, Lillebælt Hospital, Sydvestjysk Hospital and Sønderjylland Hospital. Furthermore, The Region of Southern Denmark will be the home of one of Denmark's new "super hospitals", the New Odense University Hospital, which will replace the existing Odense University Hospital. The new hospital, which will open in 2022, will be 780.000 square meters and will have 837 beds.

Inhabitants in the region: 1,2 million.

From 2020, Columna will replace The Region of Southern Denmark's current electronic health record, where typically there are around 2.8 million journal searches per day. Columna becomes the primary tool for The Region of Southern Denmark's about 22,000 doctors, nurses, secretaries and other employees in the region's hospitals.

About Medicine

Medicine Ltd is specialized in connected care solutions. Originally a Finnish company, it operates in all Scandinavian countries and the EU. Medicine's core product Medicine Suite is the result of over 15 years of research and development. It offers tools for new, more effective care where patients' active participation in the prevention and care processes and efficient communication between all parties in the care community is essential.
